

ABOUT MINSOFT

We pride ourselves as a local software design and development company. We have been operating for over 5 years with a current Certificate of Compliance from PNG Internal Revenue Commission (IRC) and PNG Investment Promotion Authority (IPA). This means that we have operated within the requirements of doing the nature of our business in PNG.

WHAT WE DO

We are specialized Information Communication Technology company in Software Engineering. We can do one of the following:-

1. Software Design
2. Database Design
3. Website Design
4. System Integration
5. Systems Documentation

AGENT: LEONARD WANUSIM

Designing and Developing Software Solutions that are appropriate and applicable for Papua New Guinea. We are challenged and focused to solving real problems with real software solutions.

“Talk to Us Today”

FEATURED PROJECTS

Two of our highlighted projects

✓ PNG ROLL LOOKUP

For the first time in the history of Papua New Guinea the 2017 Roll was posted on PNGEC website and mobile. This allowed for people to check their names and location they would have voted. The application was internet based and worked on browsers and native cross platform mobile application. In Google Play Store type "PNG Roll Lookup" to list the app

✓ EMMYSCHOOL

School enollments and teachers resumpcion is a big problem in the country. For the first time a minister and secretary for education who saw the need directly engaged Minsoft to provide a mobile cross platform solution to address these issues. Minsoft has now completed design, development and testing of the system and are now into trials in NCD, Central and Milnebay province. In Google Play Store type "EmMySchool" to list the app.

AREAS TO EXPLORE

We would like to propose to offer system solutions in the following areas

PNG HEALTH DEPARTMENT

Current crisis in the medical supplies around the country is causing lives. We propose to build a mobile medical facility app that locates every health facility in the country and monthly stock takes are posted. This will allow responsible authorities to be notified of medical stocks around the country from a mobile in the palm of a leader's hand.

FINANCE DEPARTMENT

PSIP and DSIP acquittal has been a problem. We propose to develop a mobile system to be used for Project Management, Fund Usage and Acquittal Management. This will allow elected members of parliament, office of the rural development and any other stalk holders to monitor projects, implementation and fund usage. All projects will be GPS located.

NATIONAL HOUSING COMMISSION

Housing management has been a big issue and no one has seriously solved the problem. For the start the Housing Minister needs a software solution that will locate every Government House by GPS and occupants and rentals.

Real Problems

Real Solutions
